

Showcase version 1:

1. Text is clear, but a bit jammed up so hard to read, images look slightly off but still not that really noticeable. The spacing seems too close, making it look a bit bad. Consistency is nice. There is no white space but the background image compliments it well. Overall 3/6
 2. Links work but unfortunately not really good because I can't go back. Scrolling is fine and it works. There are no errors so that's good. Looks a bit bad on the desktop so minus a point for that. Overall 4.2/5
 3. Text is too crowded to read, good contrast. Feels welcoming but overall still crowded. Feel like I'm looking at a dictionary, Overall 2/4
- Overall for everything 4/10

-Didi

1. I like the consistent colors and fonts, also everything is lined up neatly. However I think there is too much plain text and empty space, which makes some sections look unfinished. 4/6

2. Pages images and links work correctly, as they should, but navigating around the website isn't possible. 3/5

3. I found the headings clear and the text easy to read. However some paragraphs are just too long, and I believe using bullet points will be better. 3/4

4. The theme of the website is very clear, but I think adding some borders to the text will make it a lot easier to read. 2/3

Overall: 6/10

-My dad

1. Aesthetics: The design looks very neat and clean. The colors match and everything is lined up. Cat images help the user engage with the website more. However some parts of the website are still very empty. I suggest adding more content. 3/6

2. Functionality The website functions just as should, but there isn't much functionality to it. 4/5

3. Usability: I think that the website text should have more spacing, because right now it is too crowded with all the text present on the site. As well as that, the text should be larger. However, the topic of the website is really clear. 2/4

4. Bonus Criteria: The writing is engaging and has a lot of info, however there is way too much of it. No grammar or spelling mistakes. But perhaps add a bit more spacing in between the text. 2/3

Overall: 6/10

-A friend

Showcase version 2:

1. Text is clear everything is great but too much info, the way you aligned it up seems very cramped, so my suggestion is to simplify your info and make it pleasing to the eye so I give it a nice 5/6

2. Everything load and is responsive 5/5

3. Is user friendly but doesn't seem welcoming, make it feel welcoming and enjoyable for the user. Color contrast seems very shocking. However it looks quite bland 3/4

Overall 7/10

-Didi

1.Aesthetics: I like the consistent colors, fonts and layout, because they make the site look clean and match the cat theme. But I think some sections could use a bit more spacing, to make it a bit less packed. 5/6

2.Functionality: The website loaded properly, scrolled smoothly and the adoption link worked. If you have time, perhaps you can break down each topic(cat care, cat moods, cat breeds) and add simple navigation between them, which will make moving between sections easier, and make it so that the user only reads the stuff he wants to read 5/5

3.Usability: I found the headings and bullet points made the information easy to read and find quickly. I think some of the longer paragraphs could be slightly shortened though. 3/4

4. Bonus: I could immediately tell the website is about cats, and different topics make me want to learn more about cats. More sections, and more variety between them will make the website even more interesting. 3/3

Overall: 9/10

-My dad

1. Aesthetics: I think this version looks a lot cleaner than the last one. The three sectors are lined up nicely and the cat pictures fit the theme. Furthermore, the bullet points make the text a lot easier to read. Maybe you could add a few small icons for decorations around the page to make it even more eye-catching. 6/6

2. Functionality: The website works nicely on all different kinds of devices(computers and phones). Scrolling is clean and the "click here" link is very easy to spot. Perhaps you should make it so that the website has multiple pages, however for this specific page, the functionality is good. 4/5

3. Usability: The headings are clear, the text is easy to read, also I appreciate the bolding of key words, because it makes finding information easy. Perhaps you should experiment with mobile a bit more though, because some of the text is very small on mobile, therefore very difficult to read. 3/4

4. Bonus: Title is very obvious. Title and images both make the theme and purpose of the site very clear. Maybe if you have time, add something interactable like a cat quiz, or something similar. 3/3

Overall: 9/10
